

ThermoTex 7F

branded for you.

Trans Press 1

The first-class manual transfer press Trans Press 1 is ideal particularly for transfer printing on large-sized textiles such as T-shirts, Sweatshirts and jackets. The particularly large opening angle means great convenience when preparing textiles for Trans Press 1.

- Smooth-running pressure lever and particularly large opening angle for convenient operation
- Spindle mechanism for adjusting the height of the lower plate, thus varying the pressure setting for different material thicknesses e.g. T-shirt compared to jacket
- Easy-to-use display shows working temperature and pressing time
- Wide range of uses: transferring emblems of all kinds, heat-sealing labels, repairing textiles, peeling off labels, thermal fixing
- Working temperature can be adjusted from 80 to 220°C
- Variable heat-seal time from 0 to 990 seconds
- Fast replacement of the lower plate; easily exchangeable lower plates in different sizes available (sizes see reverse)
- Electronic temperature control
- Timer with acoustic and visual signal
- Minimum maintenance
- Robust design

Technical data:

230 V, 50 Hz, 2.000 W 
550 mm wide
1.100 mm high when open
900 mm deep
Space required: 600 x 600 mm
Size of upper plate: 400 x 500 mm
Weight: 50 kg

Printing surface (lengthwise):

400 x 500 mm, Artikel-Nr. 15288

Printing surface (crosswise):

500 x 400 mm, Artikel-Nr. 15289

Versatile solutions for your textiles

There are many different kinds of emblems for top quality marking of workwear and safety garments, PU/rain/promotion/sport/leisure wear together with textile advertising media, and also for general textile marking: „Brillant“ emblems with a blended fabric textile surface, „Profi“ emblems made of polyester, „FTC“ emblems for exposed motifs, sublimation emblems for complicated motifs with high colour brilliance, and much more besides. You will also find that ThermoTex offers additional materials and supplies for practical, top quality marking and repair of your textiles.

Brillant labels

Our Brillant labels are emblems with a textile surface made of blended fabric for heat-sealing. They are ideal for light, dark and non-strech fabrics with many different surface structures, e.g. for workwear and protective

clothing. They are available cut or die-cut. Brillant labels can also be supplied in a self-adhesive version for pre-fixing.

FTC emblems

FTC is a top quality emblem for many applications. It is also suitable for slightly stretchy fabrics and can be used for exposed motifs. This makes

it ideal for universal use at heat-seal temperatures between 180 and 204 °C.

Sublimation emblems

Emblems produced by sublimation printing provide outstanding printing and colour quality also for very thin lines and elaborate motifs.

They are available in various standard sizes.

Lower plates – Teflon
