

With two working plates

## Twinyamat *Electronic*

*TWINYMAT is convincing with its superior functional concept based on two working stations. With its robust technical system and intelligent electronic control, the machine guarantees a greater output and more convenient working.*

- Wide performance range: heat-sealing of emblems and textile labels / transfer application / indelible marking of workwear / indelible marking of linen / textile mending
- Modern graphic display with many useful functions: display of function and operating status, pre-setting of the heat-seal parameters such as temperature and time, selection of the required language (D/GB/F/NL), quantity and operating hours counter, and much more besides
- Easily exchangeable lower plates in different sizes (see back side)
- Fully variable pressure control
- Heavy-duty heat element with 750 W for heating up quickly
- Unlocking switch to interrupt operations or to remove labels
- Shock absorber system

### Technical data:

230 V, 50 Hz, 750 W  
 620 mm wide  
 515 mm high  
 410 mm deep  
 Weight: 30 kg  
 Size of upper plate: 150 x 115 mm  
 Working pressure: 4 - 5 bar

Art. No. 15402

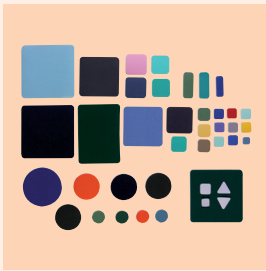

# Accessories for heat-seal machines

## Versatile solutions for your textiles

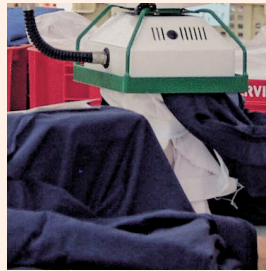

For our TWINYMAT we not only offer an extensive range of materials and supplies but also the necessary accessories. The materials and supplies are highly varied and fulfil many different quality criteria. Our accessories have been specially selected and are ideal for practical use. In this way, you can ensure a continuous, uninterrupted work process in your company at all times.

## Servicing kit for heat-seal machines

The servicing kit for heat-seal machines consists of a cleaning paste, temperature measuring strips, self-adhesive Teflon fabric, silicone pad for the lower plate and special silicone glue.

## Temperature measuring strips

Different versions of temperature measuring strips are available for reliable temperature measurement at heat-seal machines. The indicators change colour to clearly show the current temperature.

	<p>Tip: check the temperature of your machines every day!</p>
