

Trans Press 10

This heavy-duty pneumatic transfer press offers greatest handling comfort. It is intended specially for ready-made clothing and finishing work for sportswear and workwear. Equipped with two working plates the Trans Press 10 guarantees fast results and is ideal for coping with large working volumes. The additional working space means great convenience when preparing textiles.

- Two working plates for rational, fast working
- Ideal particularly for heat-sealing emblems on large-sized textiles such as t-shirts, sweatshirts and jackets
- Extra working clearance thanks to an easy running, swivelling heat plate with approx. **90 mm space** between printing surface and upper plate
- Two-hand control for highest safety
- Easy-to-use display shows working temperature and pressing time, 3 function keys for easy parameter pre-selection
- Wide range of uses: transferring emblems of all kinds, heat-sealing labels, repairing textiles, peeling off labels, thermal fixing
- Working temperature can be adjusted from 80 to 220 °C, variable heat-seal time from 0 to 990 seconds, steady-going pressure adjustment
- Integrated safety mechanism: the process is only enabled after reaching the necessary temperature
- Fast replacement of the lower plate; easily exchangeable lower plates in different sizes
- Electronic temperature control, temperature evenly distributed
- Minimum maintenance
- Laser pointer for precise label placement available as an option

Technical data:

230 V, 50 Hz, 2,000 W
 920 mm wide (with lower plates)
 820 mm high
 750 mm deep
 Space required: 670 x 640 mm
 Size of upper plate: 400 x 500 mm
 Printing surface per plate:
 400 mm wide x 500 mm deep
 Weight approx. 125 kg
 Air pressure: 2.5 – 8 bar

Art. no. 16461

Versatile solutions for your textiles

For high quality marking of workwear and protective clothing, PU garments, rainwear, promotion clothing, sportswear and leisurewear as well as textile advertising media and textile marking in general: "Brillant" emblems with a blended fabric textile surface, "Profi" emblems made of polyester, "FTC" emblems for cropped motifs, sublimation emblems for complicated motifs with high colour brilliance, and much more besides. You will also find that ThermoTex offers additional materials and supplies for practical, top quality marking and repair of your textiles.

Brillant labels

Our Brilliant labels are emblems with a textile surface made of blended fabric for heat-sealing. They are ideal for light, dark and non-stretch fabrics with many different surface structures e. g. for workwear and protective

clothing. They are available cut or die-cut. Brilliant labels can also be supplied in a self-adhesive version to pre-fix the labels before heat-sealing.

FTC emblems

FTC is a top quality emblem for many applications. It is ideal for all slightly stretchy fabrics and also can be used for cropped motifs. This makes it

very versatile in use. Heat-seal temperature: 190 °C.

Sublimation emblems

Emblems produced by sublimation printing provide outstanding printing and colour quality also for very thin lines and elaborate motifs.

They are available in various standard sizes.
