

New design!

P-3 Futura *Electronic*

P-3 FUTURA is a pneumatic heat press which excels above all on account of its oversized opening angle. The machine is therefore extremely convenient, offering plenty of space for many different textiles and maximum freedom of movement for the user. The new model is very compact and equipped with a blue graphic display for even better legibility. The control is simple and provided by a microprocessor. P-3 FUTURA is based on a reliable electronic module and sound technical system, offering optimum safety and operability.

- Wide performance range: fastening textile labels / transfer application / repair and marking of workwear / indelible marking of linen
- Modern graphic display with many useful functions: display of function and operating status, pre-setting the heat-seal parameters such as temperature and time, selection of the required language (D/GB/F/NL), quantity and operating hours counter, and much more besides
- Easily exchangeable lower plates in different sizes (see back side)
- Shock absorber system
- Unlocking switch to interrupt operations or for label removal
- Foot switch operation

Technical data:

230 V, 50 Hz, 750 W
600 mm deep
195 mm wide
355 mm high when closed
520 mm high when open
Weight: 28 kg
Size of upper plate: 150 x 115 mm
Working pressure: 4 - 5 bar

Accessories for heat-seal machines

Versatile solutions for your textiles

For our P-3 FUTURA we not only offer an extensive range of materials and supplies but also the necessary accessories. The materials and supplies are highly varied and fulfil many different quality criteria. Our accessories have been specially selected and are ideal for practical use. In this way, you can ensure a continuous, uninterrupted work process in your company at all times.

Servicing kit for heat-seal machines

The servicing kit for heat-seal machines consists of a cleaning paste, temperature measuring strips, self-adhesive Teflon fabric, silicone pad for the lower plate and special silicone glue.

Temperature measuring strips

Different versions of temperature measuring strips are available for reliable temperature measurement at heat-seal machines. The indicators change colour to clearly show the current temperature.

	 Tip: check the temperature of your machines every day!
